Salans FMC SNR Denton Oleszczuk sp. k had the pleasure to work with Datapoint during a M&A transactions executed for one of our customers. Datapoint has provided a unique tool to support this type of project from the technical side. The Datapoint VDR has created an environment in which the process of transferring documents to potential investors was fully safe and controlled.

In addition to an extremely functional and safe system, Datapoint stands out above all due to a professional team of people. A professional training on Datapoint VDR system carried out by a dedicated project supervisor has enabled us to effectively use all the functionalities of the platform. What's more, the Project Manager was at our service for the entire duration of the project, sharing valuable knowledge tips and good practices on how to use particular functions of the system and fit them into our current business needs. Thus we ensure that the project runs smoothly and without interruption.

In our opinion, the Datapoint Team is a group of high-class experts. Their experience, flexibility and openness to our needs were irreplaceable. Using the services of Datapoint was definitely the right decision. This is a trustworthy and reliable business partner.

Sincerely,

Ewa Płocharska  
Marketing & PR Director
