## References

TDI Corporate Finance Sp. z o. o. had the pleasure of working with the Datapoint Team during advisory projects related to M&A transactions.

In these projects Datapoint was a service provider of the Virtual Data Room. In our opinion the platform offered by Datapoint is an indispensable tool, elevating the efficiency and security of transactions.

The satisfactory co-operation is not only a result of an intuitive and secure system. What is also worth mentioning is the approach adopted by the company and the professionalism of the whole team. Commitment, flexibility, putting the needs of the customer first, and a full availability are qualities that are particularly important for companies operating in the mergers and acquisitions field. Qualities that we personally appreciate.

The Datapoint Team has gained a recognition in our Company. Our previous cooperation proves their high qualifications and we shall recommend it as a reliable and friendly business partner that strives to meet any expectations of its customers. The commitment and passion of employees of Datapoint, which we have often experienced ourselves, should also be emphasized.

Sincerely,

WICEPREZES ZARZĄDU  
  
Paweł Roszkowski

*TDI Corporate Finance is one of the leading and most experienced Polish consulting firms. The Company has been continuously present on the market since 1991 - previously operating under its then registered name TDI Towarzystwo Doradztwa Inwestycyjnego Sp. z o. o. - and over this period of time we have successfully completed a few hundred advisory projects of a different scale.*
