InvestSight Sp. z o.o., a consulting company specializing among others in advising on M&A projects, decided to start co-working with Mergers Net Sp. z o.o. in regards with a sale process conducted for one of its clients. In order to ensure the highest safety standards of the transaction, we decided to use the Virtual Data Room solution offered by Mergers Net Sp. z o.o.

The Virtual Data Room fully met our expectations. The application enabled a very clear presentation of data and secure access to it for all investors with whom negotiations were carried on about the potential sale transaction. The system is intuitive and easy to use. It gave us a full control over enabled documentation. In addition, the usage of a dedicated to communication panel called Questions & Answers, allowed us to centralize the whole communication in safe environment, but also made the management of all questions that have been raised by investors easier.

We look forward to recommending the services offered by Datapoint to our customers.

Sincerely yours,
