Work Express Sp. z o.o. has partnered with Mergers Net Sp. z o.o. during the sale of shares of the Company. In order to ensure the highest safety standards, we decided to use the tool Virtual Data Room Datapoint. The Advisor in the transactions was Trigon Dom Maklerski.

In our opinion VDR Datapoint is an effective tool that has improved and increased the comfort of work for the entire team involved in the transaction.

The use of the system has shortened the time needed to execute the Due Diligence process and did not disturb the daily operation routine of the Company, since the access to confidential documentation was possible 24h/7 days a week from anywhere, using a web browser only. It is worth mentioning that only a day after signing the contract we received access to the Virtual Data Room platform, dedicated to our project.

Throughout the project the whole team has been assisting us and showed a pro-active approach, making our partnership ran very smoothly.

Sincerely,

Grzegorz Koziołek
Prezes Zarządu -Dyrektor Generalny
President of Management Board - CEO
