Inter Groclin Auto S.A. has decided to co-operate with Mergers Net Sp. z o.o., to collaborate with one of its business partners, Kabel-Technik Polska Spółka z o. o. The application offered by Mergers Net significantly influenced the quality and efficiency of the process, while ensuring the safety of the exchange of any shared files.

The VDR system facilitated the bilateral exchange of documents between our companies, ensuring safe and controlled access, regardless of the time or location.

The application is in our opinion very user-friendly, and its structure clear and intuitive, making the transaction based on sensitive files run very smoothly.

A crucial aspect of the process was to ensure the highest level of safety and the absolute control of the any uploaded documents. Datapoint VDR, with all its security mechanisms at the level provided by the banking services, as well as additional functions such as reporting on the activity of individual users or the ability to selectively manage access rights ,fully met our expectations.

Our collaboration with Datapoint team was a success. The company and its employees are highly professional and open to any desires of their clientele.

Sincerely,
P R E Z E S
