## References

Budoserwis Z.U.H. Sp. z o.o. (The Company) which provides comprehensive consulting services, has been cooperating with the Datapoint team in the process of privatization of the Ciepło Kaliskie company. The process resulted in the sale of 90% of shares by the City of Kalisz to the potentate from the city of Elbląg - ENERGA Kogeneracja, for the amount of nearly 46 million zloty.

In order to ensure an unrestricted access to the entire documentation, while maintaining the highest standards of security and confidentiality of data, the company decided to use a file sharing tool, i.e. the Virtual Data Room (VDR).

VDR is an extremely user-friendly and intuitive application. Loading files, inviting users and granting any necessary access rights to documents is very easy. Thanks to a specially designed reporting system, not only did the company have a full control over documentation throughout the whole process, but also received a tool for monitoring areas of interest of investors. Therefore, from the very beginning, the privatization process ran extremely smoothly and without any interruption.

We will, with pleasure, recommend the Virtual Data Room application to any of our customers.

Yours Sincerely,

BUDOSERWIS Z.U.H. Sp. z o.o.  
Dyrektor Zespołów Usług Konsultingowych  
Prokurent  
  
Gabriela Michalik

*Budoserwis exists continuously for over 20 years now. It is a rapidly growing consulting, investment and repair centre. It is one of the first companies with Polish capital, which in the 90's was involved in restructuring processes of the polish industry. We specialize in consulting services in the field of valuation, analysis and expertise, and provide a comprehensive and professional service in real estate area. The second pillar of our specialty is mounting, repairs of machinery, equipment and installations, as well as the general execution of any building investments.*
