Grant Thornton Sp. z o.o. collaborated with Mergers Net Sp. z o.o. to facilitate a project for two clients whose requirement was to initiate and organize a close business relationship between them. This process required a reliable and fully controllable environment which could facilitate secure file sharing. We decided to use a specially dedicated tool for this purpose, a Virtual Data Room, Datapoint VDR.

Virtual Data Room (VDR) Datapoint met our expectations, both in terms of intuitive use of the system and guaranteed levels of security. The biggest advantage of VDR that we would like to point out is that during the whole process of sharing files, both we, as a consultants, as well as our clients, had full control over the entire documentation.

We highly appreciate the co-operation shown by the Datapoint team members. The professionalism they offer along with numerous innovative solutions significantly reinforced the effectiveness of a project carried out on behalf of our clients. We look forward to recommending Datapoint VDR system for any further partnership between Grant Thornton and Mergers Net Sp. z o.o.

Sincerely,
Departament Doradztwa Gospodarczego
